ESTEBAN JOEL PALLERO

SOFTWARE DEVELOPER

💼 WORK EXPERIENCE

➢ Nov 2022 – Currently **Portfolio's Developments**

Portfolio: https://joelpallero.com.ar
My portfolio is designed on pure html, css and js. Currently i´m designing a store to be add in it, for my mother´s personal business, all designed just with js, and local JSON files. (https://github.com/JoelPallero/Portfolio)
As you will be able to observe at my portfolio, I have a few clients since January 2023.
I designed and developed all the pages you will see and I fixed one of them. I have a few more websites that I did build, but those websites needed to be online just for a season, so it is not possible to access them right now. Although, I still manage the current hosting and domain of those websites.

➢ Apr 2017 – Nov 2022 **Call Center Operator**
Grupo N
Córdoba, Argentina

- Post-sale control
- Coordination and re-coordination of visits for the installation of internet service, technical assistance, technology changes, removals, and cancellation of the Claro Hogar service
